ACDelco

PROFESSIONAL SEVERE DUTY BRAKE PARTS

ACDelco's Professional Severe Duty brake rotors, pads, calipers and hardware are **not "lightweight" options**. ACDelco's Severe Duty **rotors** offer outstanding stopping power for towing applications. ACDelco's Severe Duty brake **pads** provide exceptional performance and confident braking for trucks towing heavy loads. And our severe duty **calipers** are tested to help withstand the elements and built to handle the stress of braking with additional weight.

PADS

- Designed to help **withstand the high temperatures** associated with braking when towing additional weight
- **More durable** and better wear than standard truck pads
- Mechanical Locking System holds friction material firmly in place, to help with **retention strength and long term durability**
- Constrained multi-layered shim helps to deliver optimal **noise dampening**
- **Premium hardware** included where applicable

CALIPERS

- **100% new** – No core return required
- **100% new seals** and components
- **100% end of line** tested and pressure tested for leaks
- **Black zinc coated** body and silver zinc bracket
- High temperature silicon boots and lube
- ASTM B-117 Salt spray tested
- Pre-lubrication of critical points
- **Friction ready**
- ACDelco logo on caliper where room available

ROTORS

- **COOL SHIELD™** coating on the rotor surface and specialized paint on the hat help with corrosion resistance
- **High Carbon iron content** helps reduce brake fade at high temperatures which means a fast recovery rate, which helps the rotor stay cooler and reduce noise
- Application specific vane configuration helps dissipate heat
- **Specially designed venting S-Grooves** help improve gas outflow from rotor and increase pedal feel and performance
- **Advanced design** eliminates the need to drill holes that are prone to crack
- 30% improvement in pad wear
- More than **175 total part numbers** for GM and non-GM vehicle applications
